

LEGACY FIG LEAF:

LEGACY Fig Leaf combines our rugged, military derived break-wire with our proven seismic sensor to create a complete, secure solution to protect statues and high value artefacts.

LEGACY Fig Leaf Break-Wire comes in lengths up to 5m, which is pre-terminated and ready for instant deployment.

The seismic sensor is fixed to the statue plinth to provide highly reliable alerts to statue theft or vandalism. The seismic analytic firmware has a carefully designed algorithm to distinguish between passers-by and genuine attacks, particular useful for sites where high levels of traffic maybe a concern.

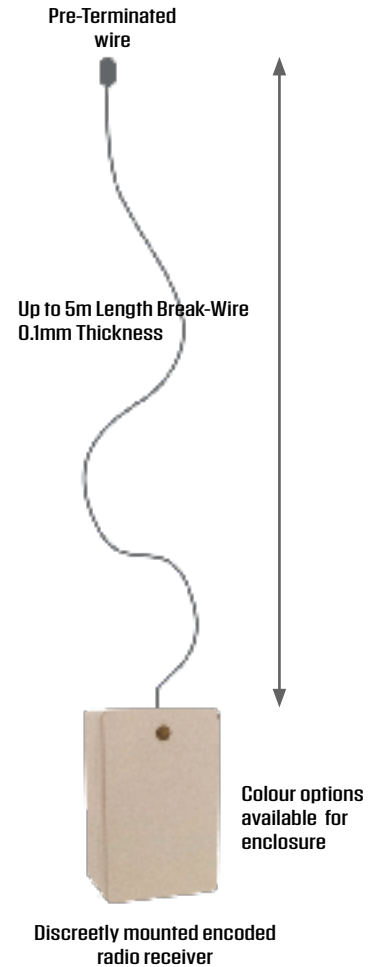

LEGACY Fig Leaf
Statue Protection

A SEISMIC AND BREAK-WIRE PROTECTION SYSTEM TO SECURE HIGH VALUE STATUES, AND PRICELESS ARTEFACTS

SPECIFICATIONS ARE SUBJECT TO CHANGE WITHOUT NOTICE

LEGACY FIG LEAF:

SPECIFICATIONS:

LEGACY Fig Leaf	
Power Source	Battery Powered
Battery Life	Sentinor recommends the user replace the battery annually
Auto-Test	Yes (24 hour - Daily)
RF Frequency	TBC
Range	Typically 200-300m
Transmitter Box Dimensions	TBC
Break-Wire length	Up to 5 Meter length
Break-Wire	0.1mm thickness
Antenna Type	TBC
