

## **WORKSHOP ASSEMBLY TECHNICIAN**

**Location: Cheddar, Somerset.**

**Fixed Term Contract 1 year**

**Salary: £25,000pa**

**Hours: 40 hours per week**

We are recruiting for a Workshop Assembly Technician to join our Sentinor team, a security service and solution provider based in Somerset with over 20 years experience in the national infrastructure protection industry. We manufacture and provide bespoke security sensors, systems and solutions. At Sentinor we pride ourselves on quality standards to ensure we deliver an excellent product, every time, to our clients.

### **What will you be doing?**

- In this varied role you will be working in a team, assembling and testing bespoke products, analysers and sensors to meet product schedules and deadlines, working to the Sentinor manufacturing processes.
- You will undertake research and development around innovative products to be supplied to the water industry and also bespoke projects, suggesting improvements to increase efficiency.
- On a daily basis you will follow the bill of materials to ensure that products are built correctly, to the required standards, that resources are effectively utilised and that quality control checks are completed.
- On completion of the manufacture process, you will ensure that the relevant paperwork is completed and that the goods are ready for dispatch. You will also be responsible for carrying out final packing for all finished products against the work order packing list, ensuring all items are correctly labelled.
- It is essential that the manufacturing process meets ISO 9001 2015 standards and you will use your attention to detail to meet this standard, recognising and reporting any quality issues that arise.
- You must adhere to the Sentinor Health, Safety and Environment policies and guidelines relating to static handling and ensure that all work areas are kept clean and tidy.

### **What we need from you:**

- GCSE or Level 2 in Mathematics and English
- It is essential that you have experience in a relevant manufacturing background
- Awareness of Health & Safety and relevant legislation
- Good communication, analytical skills and attention to detail
- Computer literate and be able to interpret complex data
- It is desirable that you have a current Driving License
- Due to the nature of the contracts that we attract you may be required to be DBS checked.

**At Sentinor we value our team colleagues, investing in their careers and offering quality training and development, which helps make the greatest long-term difference and happiness in work.**

### **Interested to join the Sentinor Team?**
